ICAR- National research Centre for Orchids
Pakyong, Sikkim -737106

The following technologies developed by ICAR-National Research Center for Orchids, Pakyong, Sikkim-737106 are available for commercialization. The lists of technologies are given below:

1. Darjeeling Nymph (*Cymbidium* Hybrid).
2. Darjeeling Delight (*Cymbidium* Hybrid).
3. Sheetal-1 (*Paphiopedilum* hybrid).
4. Modified CTAB Method for genomic DNA isolation from fresh matured leaves of orchids.
5. Protocol for in-vitro propagation of *Paphiopedilum*.
6. Protocol for in-vitro propagation of *Zygopetalum*.
7. Protocol for in-vitro propagation of *Dendrobium nobile*.
8. Development of Integrated Floriculture Enterprise.
9. Propagation of *Cymbidiums* through Back-bulbs.
10. Unique Packaging of single florets of *Cymbidium* orchid.
11. Flower drying Technology of Orchids.
12. Basket form waste *Cymbidium* leaves.
13. Production Technology of *Phalaenopsis*.
14. Production Technology of *Cymbidium*.
15. Production technology of *Dendrobium*.
16. Post-harvest of *cymbidium* orchids.
17. Semi-hydroponics in *Zygopetalum*.
18. Potting mixture of commercial orchids
19. Orchid Based Multi cropping/Vertical Farming and Conservation
20. DUS guidelines of Orchids
21. Bio-pesticides in insect-pest control in orchids
22. Microbial pesticides in orchids
